Department of Computer Science and Engineering

Mini-Project Presentation on

"Medical College Centric Faculty Appraisal App"

By:

Gauresh G Pai	*4JK22CS016*
Himanshu Hegde	*4JK22CS018*
Jnanesh	*4JK22CS020*
Milan C I	*4JK22CS027*

Guide:

Dr. Antony P J

Vice Principal & HOD,
Dept of CSE

Problem Statement

- Key Issue: Inefficient and inconsistent faculty appraisal processes hinder institutional growth and faculty development.
- Challenges Identified:
  - Manual workflows causing delays and errors.
  - Lack of standardized evaluation metrics.
  - Privacy concerns with sensitive faculty data.
  - Limited scalability and integration with existing systems.

Objectives

- Centralized System: Create a unified platform for efficient faculty performance management.
- Data Security: Ensure secure handling of sensitive appraisal data.
- Efficiency: Automate workflows to reduce redundancy and errors.
- Standardized Metrics: Implement clear evaluation criteria for consistent assessments.
- Role-Based Access: Enable controlled access with transparency through audit trails.
- Scalability: Design for future growth and integration with other platforms.
- User-Friendly Interface: Develop an intuitive platform for all stakeholders.

Implementation

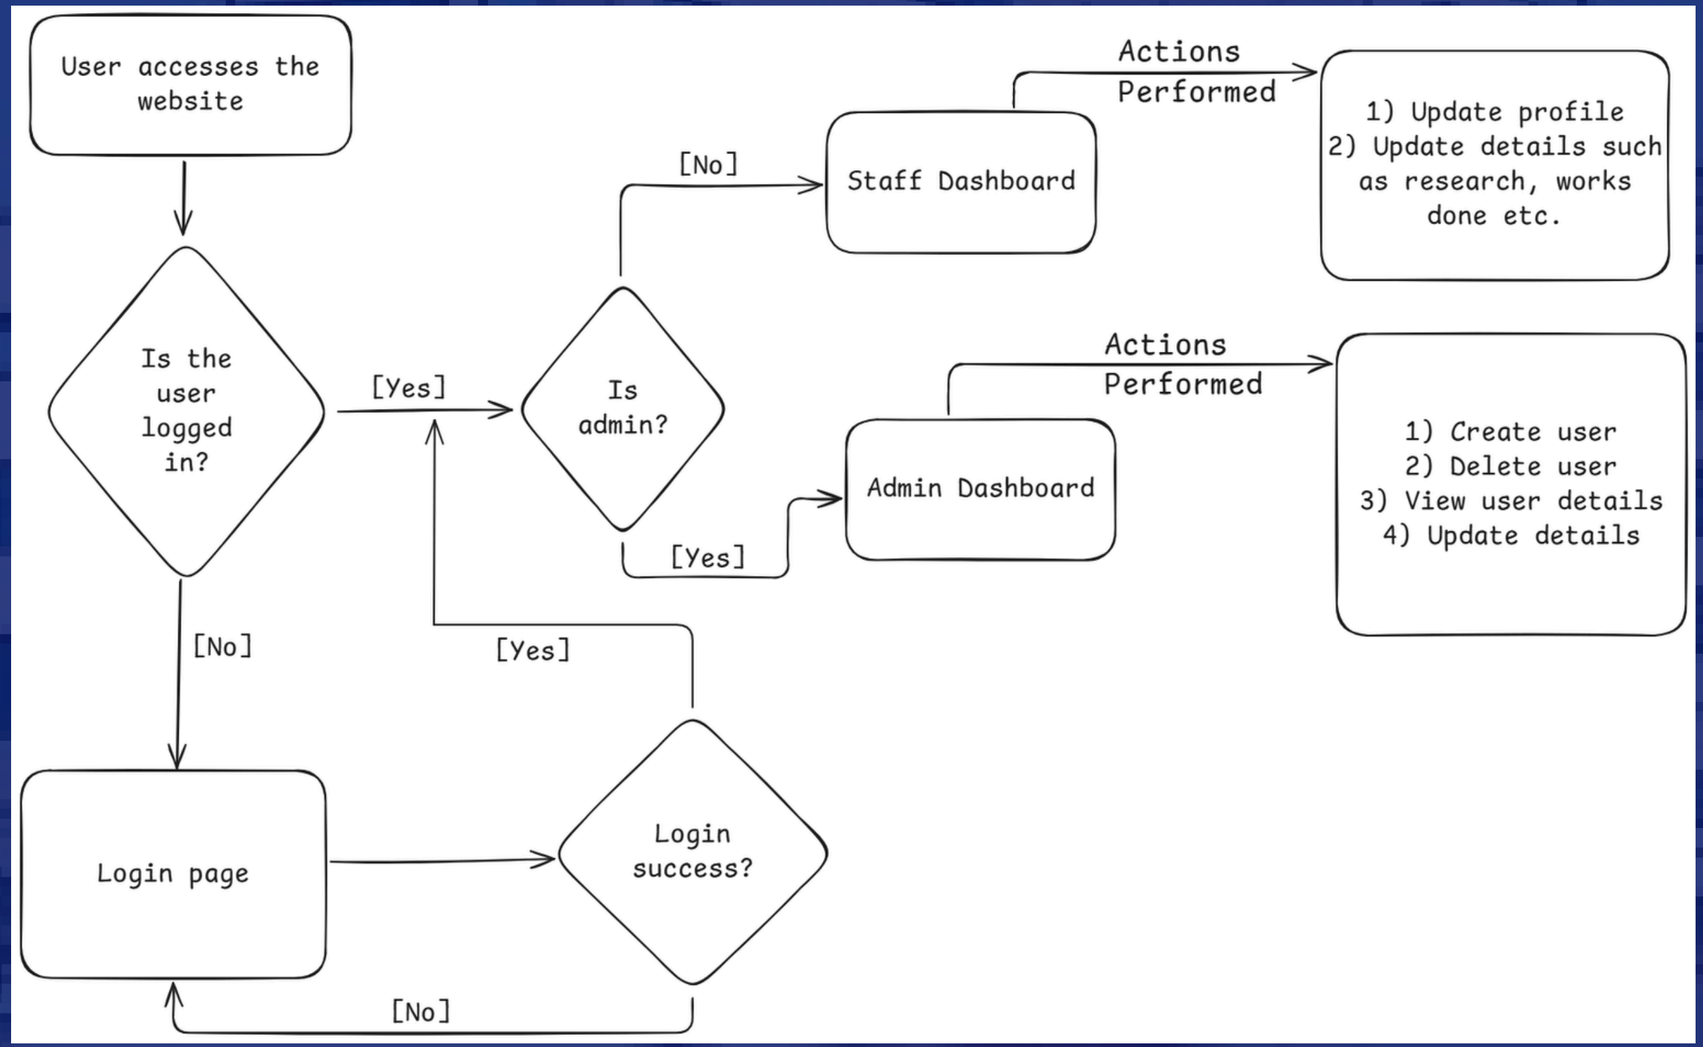

Fig: User flow

Implementation

Technologies used:

- Frontend: Html, CSS, JavaScript, Next.js

- Backend: Node.js (Next.js server actions & functions)

- Database: MongoDB

- Authentication: NextAuth with Firebase authentication

Future Work

- Scalability: Expand the system to support multi-institutional setups.
- Advanced Analytics: Integrate data analytics tools for predictive performance insights.
- AI Integration: Utilize AI for sentiment analysis on student feedback.
- Continuous Improvement: Regular updates based on user feedback and emerging best practices.
